About Us

Communities Fighting COVID:

Communities Fighting COVID is a partnership between San Diego State's [School of Public Health](#) and numerous communities in San Diego focused on providing community-based testing to specific language-speaking communities and vulnerable populations. This partnership is funded by the National Institutes of Health (NIH) [Rapid Acceleration of Diagnostics-Underserved Populations \(Radx-UP\)](#), with the aim of ensuring all Americans have access to timely COVID-19 testing and diagnosis. Many communities, particularly immigrant and people of color communities, have a harder time accessing existing COVID-19 resources due to transportation, language barriers, or other barriers.
